Proposed Concept for QVR Search Screen

The screenshot shows the NIH QVR Search Main page in a Netscape browser window. The page title is "na NIH QVR - Search Main - Netscape". The browser's menu bar includes "File", "Edit", "View", "Go", "Communicator", and "Help".

At the top of the page, there is a status bar indicating "Data Last Refreshed On Friday 2002/05/03 at 06:50 a.m.". Below this are three buttons: "Search", "Clear Criteria", and "Retrieve Saved Query".

The main content area features a red heading: "THIS IS A TEST OF: Sep/Oct02 Search Enhancements".

On the left side, there is a "Navigate Search Criteria" sidebar with a list of links: "Top", "Timeperiod", "PI/Inst", "Review/Program", "Application ID", "Budget/Award", "Text Search", "CRISP Search", "Special S...", "Advanced", and "Output/So...". Below this is a "Links" section with links for "Help", "Login", "NIEHS Info", "NIH IC's", and "Comment/Sugge...". At the bottom of the sidebar are "Switch Search Screen", "QVR Main", "Quick Search", and "Others".

The main search area contains several sections:

- IC's:** A list of checkboxes for "AHCPR", "CDC", "CID", and "CMHS". To the right is a "Pick List (left)" and a "Search List (right)".
- Project Status:** A link "Click here to expand Item:" with a right-pointing arrow.
- Active Grants:** A dropdown menu.
- Include Subprojects:** Radio buttons for "Yes" and "No".
- Section: Timeperiod:** A link "Click here to expand Section:" with a right-pointing arrow.
- Principal Investigator Starts With:** A text input field.
- New Investigator:** Checkboxes for "By Applicant" and "By SRA".
- Sponsor Name Starts With:** A text input field.
- Institution Name Contains:** A text input field.
- Institution Type:** A list of checkboxes for "Inst. of Higher Education", "Research Org/Inst/Found/Lab", "Independent Hospitals", and "Ed. Org other than Higher Ed". To the right is another "Pick List (left)" and "Search List (right)".

Four orange callout boxes provide instructions:

- "Screen item can be minimized" points to the "IC's" section.
- "Screen section can be minimized" points to the "Section: Timeperiod" link.
- "Click to expand item" points to the "Project Status" link.
- "Click to expand section" points to the "Section: Timeperiod" link.

The browser's taskbar at the bottom shows "Document: Done" and several open applications: "Start", "Inbox - Microsof...", "Address Book", "Subprojects in D...", "na NIH QVR - S...", and "Microsoft Power...". The system clock shows "12:58 PM".

The QVR Priorities and Enhancement Plans

Subprojects radio button:

- Proposal for method to indicate that subprojects should be included in the search and the output.

Test Search:

- NIEHS
- Include subprojects = Y
- Activity: P01
- State = CA
- Order by Project Number

Subprojects on the hit list:

- Subproject ID is shown in parens following the project number.

Some questions:

- What links should be displayed on a subproject item?
- Should PCC be propagated from main project, or use subproject assigned PCCs only?

QVR Priorities and Enhancement Plans

Subprojects radio button:

- Proposal for method to indicate that subprojects should be included in the search and the output.

Test Search:

- NIEHS
- Include subprojects = Y
- Activity: P01
- State = CA
- Order by Project Number

Subprojects on the hit list:

- Subproject id is showed in parens following the project number.

Some questions:

- What links should be displayed on a subproject item?
- Should PCC be propagated from main project, or use subproject assigned PCCs only?

The QVR Priorities and Enhancement Plans

Completed items

- **New columns now available for download:**
 - Expanded authorities
 - Snap indicator
 - Stem Cell lines
 - Stem Cells Used Indicator
 - External Org Ownership controls
- **Corrected nomenclature on download items:**
 - Institute Business Official changed to Institution Business Official
 - IRG changed to Scientific Review Group
 - Full Study Section changed to Study Section (Full)
 - Animal Concerns changed to Animal Codes (same for Human subject, minority, etc.)
- **Changed the name of the “Concerns” report to IRG Coding – Study Subjects**

The QVR Priorities and Enhancement Plans

These items are in test and awaiting decision about how to present:

- **New investigator**
- **Former number**
- **Stem Cells used as a special select**
- **Human, animal, minority, gender child and stem cell lines codes**

Decisions of the ECB/QVR Steering Committee at the October 23 meeting regarding Search Screen modifications proposed in previous slides

- **New investigator—include as proposed**
- **Former Number—allow user to select whether number is current number or former number. Position with current number.**
- **Group Stem Cells Used, Human, Animal, Minority, Gender, Child and Stem Cell Lines Codes in a new screen section.**
